

## Punched Openings

- Easy mechanical access
- Locking panel joints
- Structural lateral bracing as needed

Spazzer® for lateral bracing

Interior Side of Panel

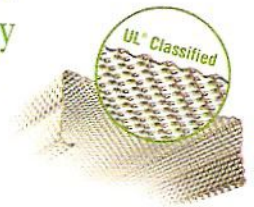

## UltraSTEEL® Technology

The UltraSTEEL® process is an internationally patented method of altering the characteristics of the base strip steel, providing higher strength capacity. UltraSTEEL® Framing Provides:

- Stiffer, More Rigid Construction
- Reduced Sound Transmission
- Improved Fire Test Performance
- Stronger Screw Retention

Products manufactured using the UltraSTEEL® process are protected by granted USA Patents (Nos. 6,183,879 and 5,689,990) and granted Canadian Patent (No. 2,149,914/1993) together with design registration.

UltraSTEEL® is a trademark of Hadley Industries Plc.

## Open Cavity

- Plenty of space for electrical and plumbing components
- Enables additional structural members to be installed with ease

## EPS — Expanded Polystyrene

- Superior insulation and acoustical benefits
- Modified to reduce smoke and flame spread
- Will not support mold, mildew and moisture

The data contained in this brochure is intended to be used as a general guideline only and does not replace the judgment and design of a qualified architect and/or engineer. Product, application renderings and photographs are provided as a tool to show the general intent of the application. They may or may not be applicable to a specific project. They do not replace or supersede the architect or engineer of record, ASTM guidelines, national or local building codes or approved industry standards.
